# Schools & Institutions

A complete, guided learning system for  
Cambridge A-Level and IB.

**1** OVERVIEW

# What Nexelia Is

---

Most revision platforms hand students a pile of tools and leave them to figure out the rest. A question bank here, a content library there. No plan, no guidance, and no sense of whether any of it is working.

Nexelia is different. It is a complete, guided learning system. An AI companion called Nexo walks every student through their entire course, from the first week of term to the final exam.

- 1 Plan**  
Nexo builds a personalised term plan around each student's exam dates and weak areas.
- 2 Learn**  
Lessons, slides, and flashcards that teach the content clearly.
- 3 Practice**  
Exam questions and AI marking aligned to the real mark scheme.
- 4 Monitor**  
Live readiness scores, predicted grades, and mastery tracking.
- 5 Adapt**  
Nexo continuously reshapes the plan based on how the student is performing.

Every student gets the kind of structured, personalised guidance that used to require a private tutor. Nexo makes it available to everyone, at any hour, for every subject, for the whole duration of the course.

Nexelia was built with the curriculum first. Every feature exists because it reflects how IB and Cambridge A-Level students are actually assessed.

## 2 CURRICULUM

# Native to IB and Cambridge

Most platforms that claim to support IB or Cambridge take generic content and add the right labels. The underlying logic is identical for every exam board, and the curriculum becomes a filter rather than a foundation.

Nexelia was built the other way around. The curriculum came first, and everything else followed.

International Baccalaureate	Cambridge A-Level
<p><b>Marking notation</b> Uses M, A, R, AG, and FT marks exactly as IB examiners do. When Nexo marks an answer, it marks it the way an IB examiner would.</p> <p><b>Grading</b> The 1–7 band scale with real IB grade boundaries. Predicted grades reflect what a student would actually receive.</p> <p><b>Command terms</b> Nexo understands the difference between describe, explain, analyse, evaluate, and justify, and coaches students accordingly.</p> <p><b>IA and EE toolkits</b> Criterion-by-criterion feedback on Internal Assessments and Extended Essays, aligned to published IB rubrics.</p> <p><b>Simulated papers</b> Replicate the real paper structure, timing, and question style for Paper 1 and Paper 2.</p>	<p><b>Exam questions</b> Each one carries the mark allocation, level-of-response descriptors, indicative content, common mistakes, a worked solution, and a model answer.</p> <p><b>Syllabus mapping</b> Cambridge learning outcomes are mapped to every chapter. Nothing exists that is not examinable; nothing examinable is missing.</p> <p><b>Mark-scheme language</b> Runs through Nexo’s coaching, AI feedback, and worked solutions, so students write in the language the examiner rewards.</p> <p><b>Skill taxonomies</b> Each subject has its own taxonomy from the assessment objectives. Nexo targets weak skills, not just weak topics.</p> <p><b>Question alignment</b> Every question is written to match the structure, style, and mark allocation of real Cambridge papers.</p>

**Subjects available today.** Cambridge: Biology, Chemistry, Physics, Economics, Business, Psychology, Computer Science, and the full Mathematics suite (Pure 1–3, Statistics 1–2, Mechanics 1–2, Further Pure 1). IB: Mathematics AA SL and AI SL, with further subjects in development.

**3** PLATFORM

# What Your School Gets

---

## For Students

- A Nexo-guided daily study plan, personalised to each student's exam dates, subjects, and performance.
- Over 38,000 exam questions across all subjects, each mapped to the syllabus and mark scheme.
- AI marking with inline annotations, so students see exactly where they gained and lost marks.
- Spaced-repetition flashcards, with Nexo deciding when each card returns based on performance.
- Predicted grades updated continuously, on the IB 1–7 scale or Cambridge A\* to E.
- Lesson slides, interactive content, podcasts, and game modes for every chapter.

## For Teachers

- A class dashboard showing every student's mastery, completion, weak topics, and predicted grade.
- Early-intervention alerts that flag at-risk students before the mock exam.
- An AI marking assistant for written work, reviewed by the teacher before it reaches the student.
- An assignment builder with differentiated tracks, plus an AI Report Writer and AI Lesson Builder.
- Parent insights, with automated weekly summaries for families.

## For School Leadership

- Department-level analytics across classes and year groups.
- Compliance reports and inspection-ready data packs.
- One school-level subscription with per-seat billing. No per-teacher or per-class fees.
- Browser-based and device-agnostic. No installation and no IT integration required.

## 4 TRUST

# Data, Security, and Compliance

We know this section decides whether a school can proceed, so we have written it to give you the complete picture.

Your data belongs to your school.

Your school controls its data. We process it only to deliver the service. It is never sold, never shared beyond what the service requires, and deleted in full at the end of your contract.

Student data never trains AI.

This is a contractual requirement, not a setting. No student interaction, answer, or profile is ever used to improve any AI model. What happens on your students' accounts stays there.

Security by design.

All data is encrypted in transit and at rest. Access is role-based with no overlap between student, teacher, and admin. No student can reach another's data; no teacher can reach data outside their school.

Regulatory compliance.

GDPR principles are our baseline everywhere: lawful basis, data minimisation, purpose limitation, storage limits, and the right to erasure. For schools in Hong Kong and Asia-Pacific, we comply with the Personal Data (Privacy) Ordinance (PDPO).

Need a Data Processing Agreement or full compliance documentation? Contact [main@nexeliaacademy.com](mailto:main@nexeliaacademy.com)

## 5 PRICING

# Pricing and Getting Started

Pricing is per seat, per year, agreed with each school based on cohort size, curriculum, and contract length. No hidden fees and no per-teacher charges. One price covers the complete platform for every student in your subscription.

- Minimum cohort of 50 students
- Volume pricing for larger cohorts
- A founding rate for schools onboarding before September 2026
- Multi-year contracts available

Onboarding takes one week.

Day 1	Contract signed. Teacher accounts created within 24 hours.
Days 1-3	Class setup and student invites, handled with your team.
Day 3	A 60-minute onboarding session for teaching staff.
Day 7	Students active and Nexo-guided from day one.

## Next Steps

We respond to every school enquiry within 24 hours.

### Book a live walkthrough

Twenty minutes. We show you the platform for your exact subjects and year groups.

Email [main@nexeliaacademy.com](mailto:main@nexeliaacademy.com) · subject line "Walkthrough"

### Request a pilot

Start with one class or year group before a full rollout.

Email [main@nexeliaacademy.com](mailto:main@nexeliaacademy.com) · subject line "Pilot"

### Ask anything

About the platform, the data, the pricing, or anything else.

Email [main@nexeliaacademy.com](mailto:main@nexeliaacademy.com)
